WORK EXPERIENCE

Full-stack Software Engineer | [Minha Visita](#)

01/2024 - present

- I work using the Scrum methodology to ensure efficient and iterative development.
- I'm responsible for implementing new screens, fixing bugs, and maintaining the system using **Vue.js**, **Quasar**, and **Capacitor**. Since it's a hybrid application that runs in a WebView for mobile, I also take full ownership of the project lifecycle, ensuring it's always up to date and running smoothly.
- When needed, I provide maintenance on our back-end services, built with **NestJS** (using **GraphQL**) and **PHP**.
- I also improve our CI/CD processes, including pipeline optimizations, and we use **Jest** for unit testing.
- To reduce bugs, I implemented **Cypress** for end-to-end testing in the system's core. Additionally, I proposed and implemented a new development workflow that significantly improved the team's productivity and increased release frequency.

Full-stack Software Engineer | [Scopi](#)

01/2022 - 11/2024

- I developed and enhanced Scopi, a complete strategic planning platform with several interconnected modules.
- On the front-end, I created new modules, maintained the codebase, and updated dependencies. The web version used **AngularJS**, and the mobile version was built with **React Native**.
- On the back-end, I developed new modules and created a public API so clients could integrate Scopi into their workflows using **Make** or their own automation tools. I also optimized the performance of critical calculations, reducing execution time from 4 minutes to just 3 seconds, using **Ruby on Rails**, **MySQL**, and **Redis**.
- Additionally, I introduced **Vue.js** as a modern alternative to AngularJS, leveraging its similarities to help the team transition more easily.

EDUCATION

Bachelor of Science in Computer Science | [Feevale University](#)

01/2022 - present

- Currently pursuing a degree in Computer Science, with a strong focus on software development, algorithms, and systems architecture.

Technical Course in Information Technology | [CIMOL - Technical School](#)

03/2016 - 06/2020

- Completed a comprehensive technical course where I gained hands-on experience in web development, including HTML, CSS, JavaScript, as well as programming in Java and C.

SKILLS

- JavaScript | Vue.js | AngularJs | React Native | Expo | MongoDB | SQL | Node.js |
- Ruby on Rails | AWS | Clean Code | Git | Cypress | Nest | Jest | RSpec | CI/CD | DRY | Scrum
- Microservices | Frontend | Backend | Full-Stack
